Professional Summary

Retail Strategy & Data Analyst with 8+ years leading commercial operations, customer experience, and team development in fashion and luxury. Recently certified in data analytics (Python, SQL, BI), with strong command of Power BI and Tableau. Proven success in regional execution, visual merchandising, and KPI analysis. Passionate about applying AI, analytics, and automation to transform operations. **“I turn data into decisions that sell-pricing, promotions, layout, and store culture.”**

Technical Skills & Tools

- **Programming & Data:** Python (pandas, NumPy, seaborn, matplotlib, plotly) · SQL (PostgreSQL, joins, filters) · Data cleaning · Statistical testing
 - **Visualization & BI:** Tableau · Power BI · Jupyter Notebook · Google Sheets · Dashboard design · Data storytelling
 - **Business Software:** Excel (pivot tables, formulas, metrics) · Word · PowerPoint · SAP · Notion
 - **Retail & Strategy:** Commercial diagnostics · Visual merchandising · OKRs & KPIs · Team training · Conflict resolution
 - **Languages:** Spanish (native) · English (C1)
-

Projects

 GitHub Portfolio: <https://github.com/Data-Analyst-AI>

Business Analysis

Analyzed user and customer behavior on the Showz platform to identify the most profitable acquisition channels and recommend efficient marketing budget reallocation.

Data-Driven Decision Making

Designed and implemented a project to prioritize marketing hypotheses and evaluate A/B test results on an e-commerce platform, driving revenue growth through actionable insights.

Store Sensitivity Analysis

Evaluated how stores respond to key commercial events, classified them by operational sensitivity, and generated strategic recommendations for campaigns and field operations
